---

## EDUCATION

### Bachelor of Commerce (Accounting)

Ain Shams University, Cairo — 2014

---

## TECHNICAL SKILLS

### Core Front-End

- HTML5, CSS3, SCSS, JavaScript (ES6+), TypeScript
- Responsive UI, UX/UI Best Practices
- Cross-Browser Compatibility

### Frameworks & Libraries

- Vue.js, Nuxt.js
- Vuex, Pinia
- Bootstrap, Tailwind CSS, Vuetify, BootstrapVue

### Tools & Technologies

- REST APIs
  - Git / GitHub
  - Jira
  - Umbraco Admin
  - Debugging & Troubleshooting
  - Project Management
  - Application Performance Optimization
- 

## PROJECTS

### CPA – Customer Protection Agency (To Be Released)

#### Vue.js, Vuelidate, Pinia, SCSS, Tailwind CSS, REST API, Umbraco CMS

- Built the entire platform from scratch, including authentication and authorization.
  - Developed multi-step complaint submission with validation and filtering.
  - Implemented file upload, notifications, and comprehensive complaint management.
  - Created responsive UI, media center, newsletter features, and agency content pages.
- 

### Quran Radio From Cairo – Official Quran Radio Website | [Link](#)

#### Vue.js, Vuex, Vue Router, Vuelidate, SCSS, Bootstrap, REST API

- Implemented live streaming radio synchronized with Cairo Time Zone.
- Built global sticky audio player across the whole website.
- Developed programs, episodes, and Quran text/recording sections.

- Built full admin system for CRUD operations for audio content.
- 

## MCIT — Ministry of Communication & Information Technology (To Be Released)

### Vue.js, Pinia, SCSS, Tailwind CSS, REST API

- Developed listings and detailed pages for Tenders, Vacancies, Media Center, and What's New.
  - Created a global printing utility for generating clean, print-ready pages.
- 

## Fulfillment Management System | [Link](#)

Nuxt.js (2.x), Vue.js, Vuex, Vuetify, BootstrapVue, Webpack 5, Vee-Validate, XLSX, Chart.js, multi-language (i18n), Authentication, Axios

- Developed a complete inventory management system using **Nuxt 2**, integrating advanced functionality through modern front-end libraries and optimized architecture.
  - Implemented **full authentication** using `@nuxtjs/auth` with secure role-based access.
  - Built **dynamic dashboards** using **Chart.js** with real-time statistical visualization.
  - Created advanced **multi-language support** using `@nuxtjs/i18n`.
  - Built reusable **form validation components** using **Vee-Validate 3**, enabling consistent and secure user input handling across modules.
  - Implemented **barcode scanning and generation** using `vue-barcode` and `vue-qrcode-component`.
  - Developed an **Excel import/export system** using **XLSX**, including smart data parsing and formatting.
  - Built multiple business-critical modules:
    - Product & item management
    - Shelves / storage unit management
    - Stock in-out operations
    - Transactions logging and printable PDF reports
  - Added **PDF export** capabilities using `vue-html2pdf` for professional reporting.
  - Integrated **moment-timezone** to ensure accurate time handling across regions.
  - Designed a clean and responsive UI using **Vuetify**, BootstrapVue, custom SCSS, and RTL/LTR support.
  - Optimized the build pipeline using **Webpack 5** for faster load times and modern asset handling.
- 

## Bayank "Modern Government Services Platform" | [Link](#)

Nuxt 3, Vue 3, Vue Router, Vuetify 3, Nuxt Auth (Sidebase), i18n v8, Chart.js 4, Vue Datepicker, ReCAPTCHA v3, XLSX, Moment.js, Hijri Date, File Saver, Animate.css

- Developed a fully modernized government services platform using **Nuxt 3** and **Vue 3**, leveraging server-side rendering, hybrid rendering, and performance-focused architecture.
- Implemented secure **NextAuth-based authentication** using `@sidebase/nuxt-auth` with session management, token handling, and protected routes.
- Built advanced **multi-language capabilities** with `@nuxtjs/i18n` (v8 beta), including Arabic, English, and full RTL support.

- Developed multiple data-driven modules with **Chart.js 4**, supporting timelines, pie charts, bar charts, and analytical dashboards.
- Integrated **Vue DatePicker** and **Hijri-Date** for dual Gregorian + Hijri calendar support.
- Implemented **Google reCAPTCHA v3** for secure form submissions and bot protection.
- Developed **Excel export/import** functionality using **XLSX** and **FileSaver** for improved reporting and bulk operations.
- Built reusable UI components using **Vuetify 3**, SCSS, and Animate.css for smooth transitions and modern UX.
- Integrated automatic **SSL redirection** using **redirect-ssl** for secure production deployments.
- Created optimized build structure with Nuxt 3's Nitro engine for high-performance API routes and scalable hosting.
- Delivered responsive and mobile-friendly layouts adhering to government UI/UX guidelines.
